## ESCOWA CALYPSO<sup>3</sup>

Calypso3 is a unique water tap, which originates from the idea to provide drinking water solutions to equally unique customers. Whether it is an inline-serving, a bar or a restaurant, catering-business, small or large conference venues or an office, Calypso3 was made to deliver!

Calypso3 features a number of equally unique functionality such as: customizable dosing for all individual water selections, three integrated aromas (sugar free/halal), adjustable sparkling saturation, a large touch display, as well as a removable (magnet attached) drip tray and an integrated cup holder, that folds up away, when not needed. Serves cold still and sparkling water, with or without aromas.
