escowa

Albatross

Albatross is our absolute bestseller. It is a slim, elegant tap tower with a modern and bold design. Albatross is available in seven different configurations – a mix of high/low, one or two taps, and four colour options, and can be connected to any Escowa cooler. It dispenses cold still and/or cold sparkling water.

It's an excellent choice as a built-in tap tower for countertop installation or on one of our freestanding base cabinets. Albatross comes as standard with tall handles marked with water selection, but can also be equipped with alternative handle designs.
