

## Automatic CO<sub>2</sub> cylinders exchanger

A smart and reliable solution that automatically switches between two CO<sub>2</sub> cylinders when one runs out – with no manual intervention required. The unit is installed between the cooler's CO<sub>2</sub> inlet and the CO<sub>2</sub> regulator (not included) on each cylinder.

It is equipped with a light indicating the active cylinder and you can easily select which one to prioritize with a simple press of a button. The stainless steel housing can be mounted in either a vertical or horizontal position, offering flexibility during installation.

### Technical data

Dimensions (WxDxH) .....	102 x 350 x 112 mm
Weight .....	2,7 kg
Max CO <sub>2</sub> pressure .....	5 bar
Power consumption .....	220-230V, 15W, 0,05A, ~ 50/60 Hz
